Making Cities Smarter

Cities 4.0 Presentation

March 2018
ASX: SNS

Contrasting Evolution
While we are talking about driverless cars
we still have cities sending officers to streets to manually monitor compliance

sensennetworks

MAKING CITIES SMARTER

Contrasting Evolution
When we have entire world map at our finger tips
cities' civil surveyors still going to streets to manually survey assets

sensennetworks

MAKING CITIES SMARTER
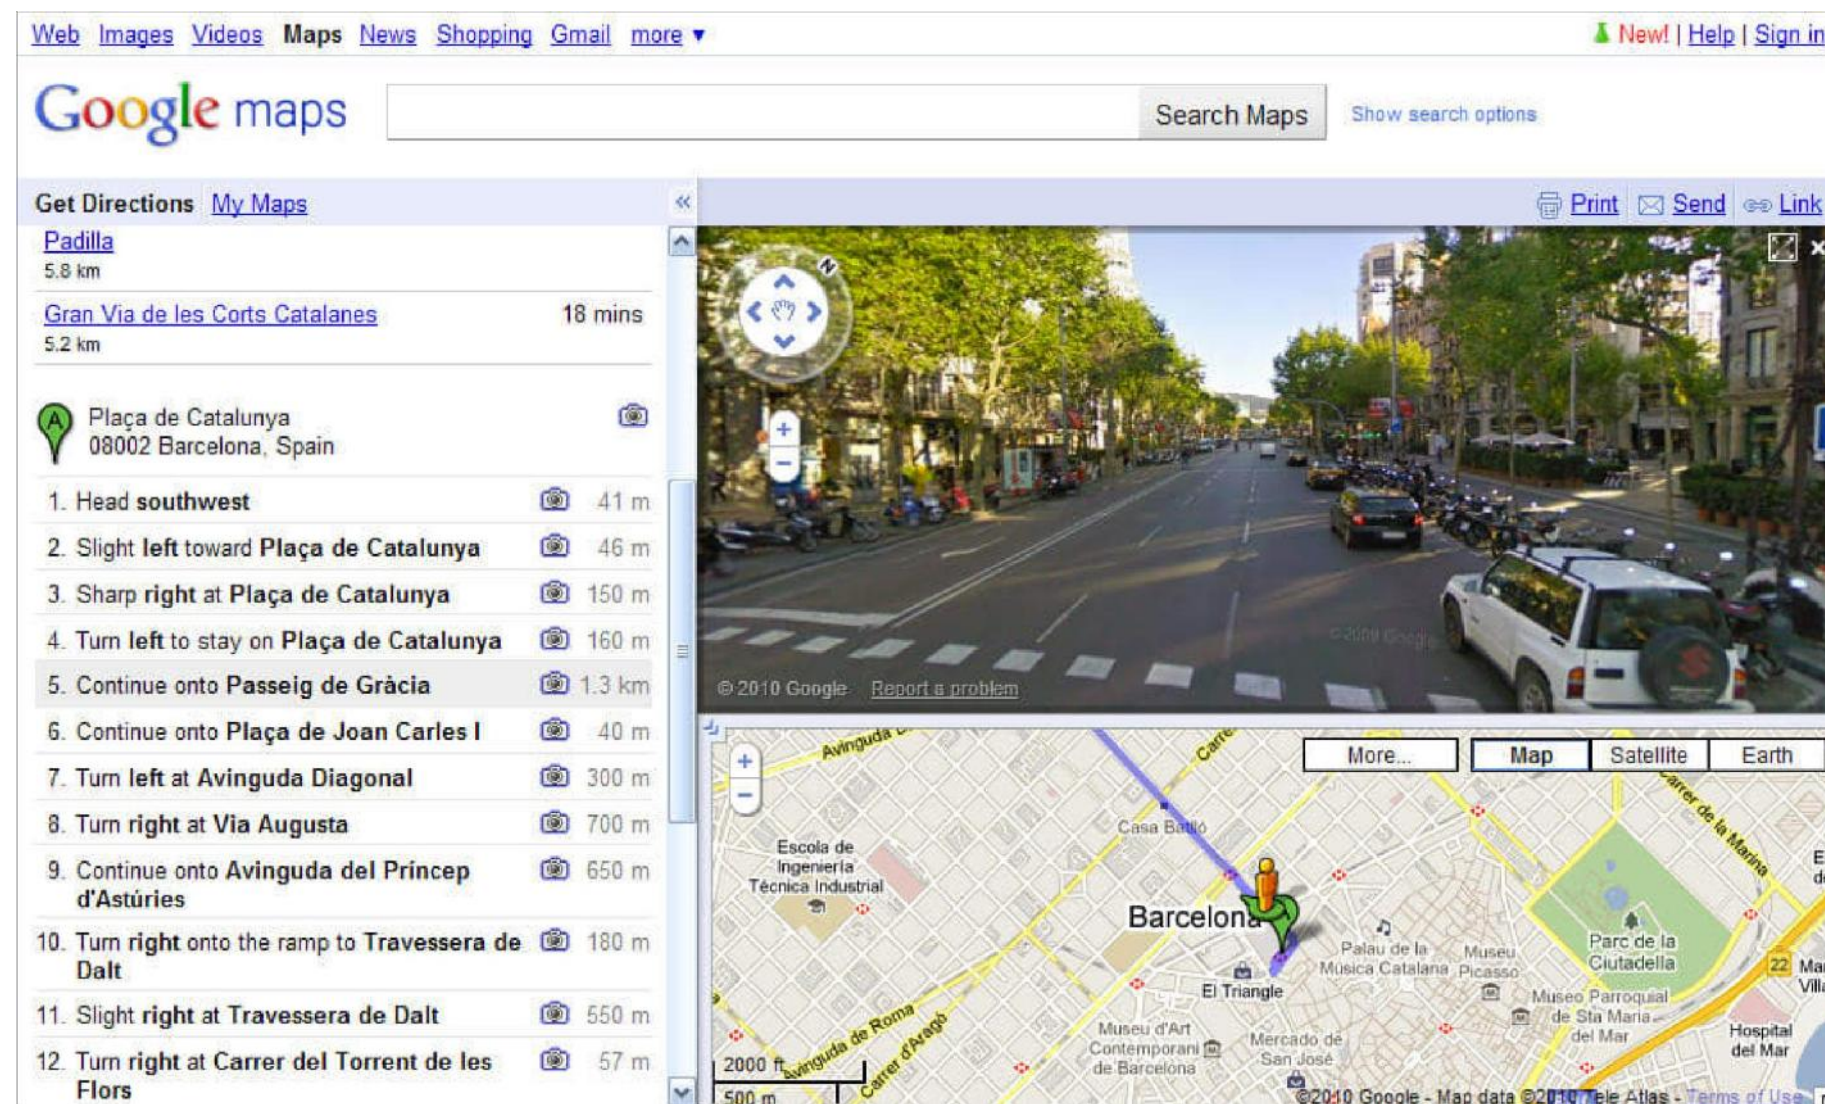

Contrasting Evolution
When technology can track every object with high precision
we have armies of people sitting behind a video wall watching streaming cameras

sensennetworks
MAKING CITIES SMARTER
While we must have an eye on the future
there is a lot that can be done
with today's technology
to make cities more efficient and
to deliver more bang for the buck for its citizens

sensennetworks

MAKING CITIES SMARTER

Making City Operations Smarter

MAKING CITIES SMARTER BY
ADDING VALUE THROUGH MULTIPLE TOUCHPOINTS

Parking Operations

- Access Control
- Occupancy Information
- Guidance
- Enforcement

Traffic Engineering Operations

- Sign & Line Audits
- Traffic data collection

Facilities Management Operations

- Footfall
- Occupancy

### Security and Safety Operations

- Security Analytics
- Speed Camera
- Bus Lane/Transit Lane
- Over dimension vehicles

MAKING CITIES SMARTER

Spectrum of Smart Cities

MEGA CITIES

PROVINCES

CITY COUNCILS

NATION CITIES

MINI CITIES

AIRPORTS

CASINOS

UNIVERSITIES

MICRO CITIES

SHOPPING CENTRES, HOTELS

SKI RESORTS, NATIONAL PARKS

ART CENTRES, LIBRARIES

MAKING CITIES SMARTER

7

Artificial Intelligence Solutions powered by
Deep Learning networks
can tap into smart infrastructure
of smart cities to
Make City Operations Smarter

While this impacts every aspect of city operations, we will focus on
Parking, Transit, Road Safety, Facilities, Security
in this presentation

sensennetworks

MAKING CITIES SMARTER

Artificial Intelligence and Deep Learning

ARTIFICIAL INTELLIGENCE
Early artificial intelligence stirs excitement.

MACHINE LEARNING
Machine learning begins to flourish.

DEEP LEARNING
Deep learning breakthroughs drive AI boom.

1950's   1960's   1970's   1980's   1990's   2000's   2010's

Since an early flush of optimism in the 1950s, smaller subsets of artificial intelligence – first machine learning, then deep learning, a subset of machine learning – have created ever larger disruptions.

Artificial Intelligence (AI)

- **AI involves machines that can perform tasks that are characteristic of human intelligence**

    - It includes things like planning, understanding language, recognizing objects and sounds, learning, and problem solving.

- **Examples in life**

    - Virtual Personal Assistants: Siri, Google Now, and Cortana (using voice)
    - Google's self-driving car project and Tesla's "autopilot" feature are two examples that have been in the news lately
    - Music and Movie Recommendation Services: Netflix

Machine Learning (ML)

- **Machine learning is simply a way of achieving AI**

  - You can get AI without using machine learning, but this would require building millions of lines of codes with complex rules and decision-trees.

- **Machine Learning involves**

  - Training – collects thousands of dog and cat images to train
  - Predict – given an input image, tell if it's a car or dog

- **ML needs algorithms to train**

  - A lot of them
  - Neural Network (NN) in one of a kind
  - NN is a computer system modeled on the human brain and nervous system.
Deep Learning (DL)

- **Deep learning is one of many approaches to machine learning.**
- **DL contains multiple layers instead of 1 or 2, which created its name "deep".**
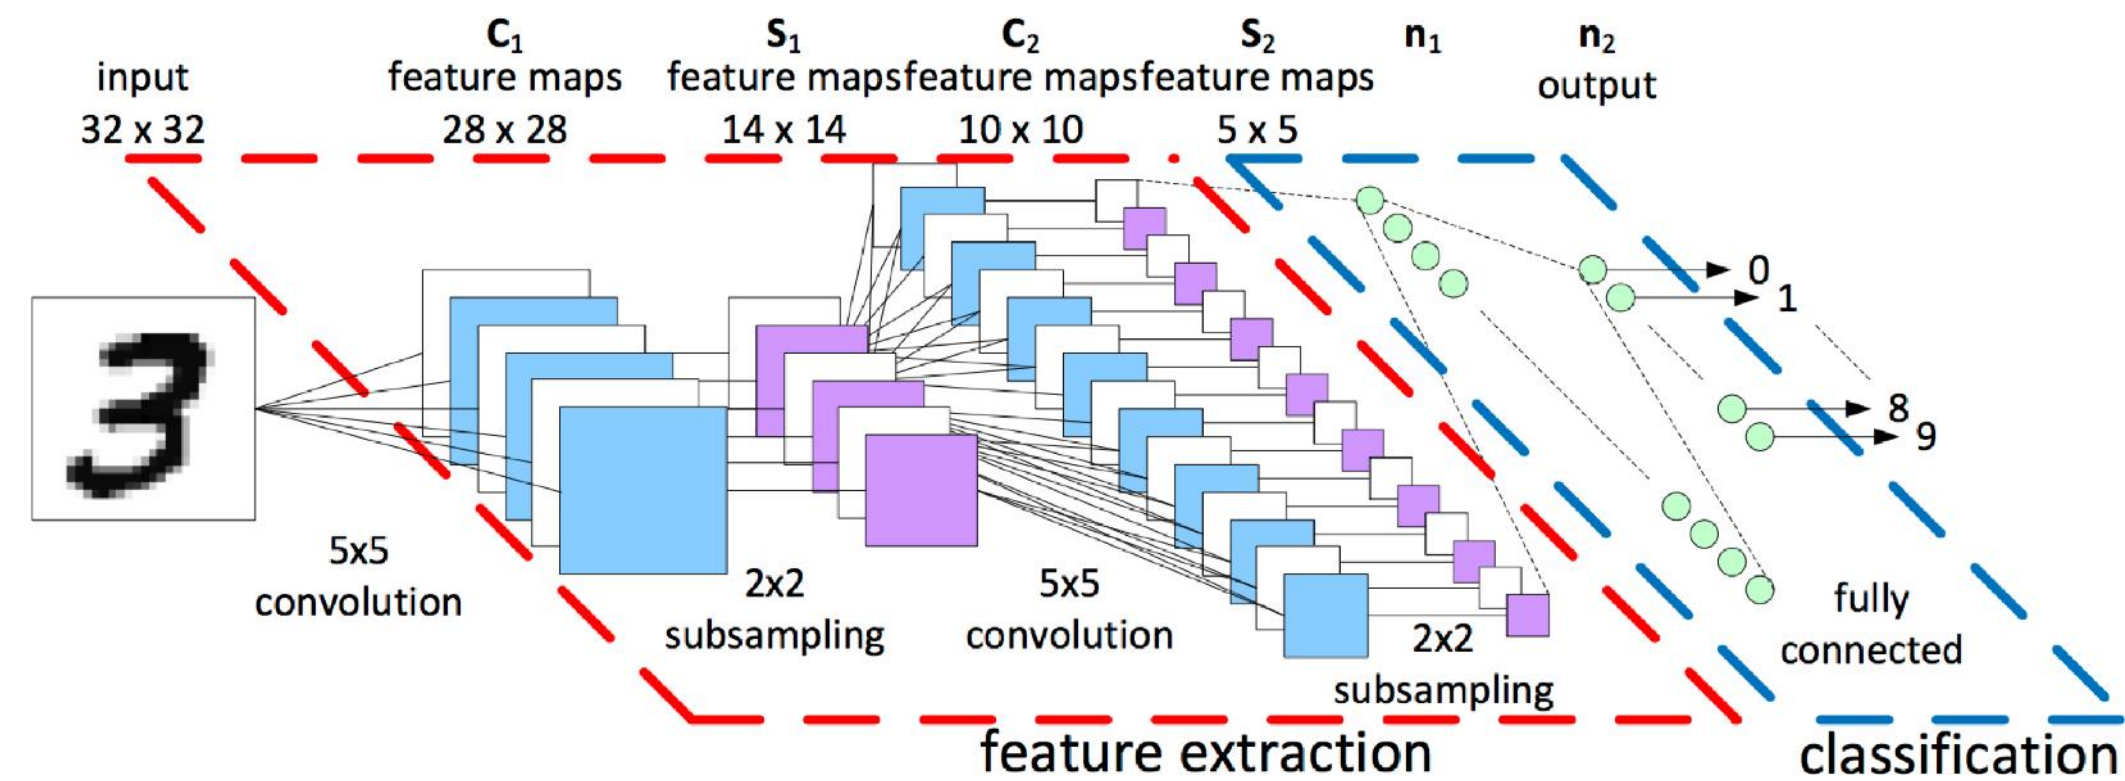

Making Parking Operations Smarter

Detecting Parking Signs & Creating Parking Zones

Mobile Parking Enforcement

Parking Guidance

sensennetworks

MAKING CITIES SMARTER
Making Road Safety Operations Smarter

Making Illegal Unsafe parking detection Smarter

Making Speeding Vehicle Detection and enforcement Smarter

sensennetworks

MAKING CITIES SMARTER

Making Security Operations Smarter

Overstay Vehicles and Unattended Object detection
Armed Offender Detection

sensennetworks

MAKING CITIES SMARTER

Smart Cities should not just be about Smart Infrastructure
It must also be about Smart Operations

There is a lot to be gained by focusing inwardly at Smart City Operations to become more efficient and deliver more value for the rates communities pay

sensennetworks

MAKING CITIES SMARTER

INDUSTRY RECOGNITION

**2017 Merit Recipient –
Automated Asset
Mapping Solution**

**2018 Global Smart 50 Award
Winner – Intelligent Video Analytics**

**Foundation Partner,
NVIDIA Metropolis Partner Program**
