SenSen Wins 2018 Global Smart 50 Award

SenSen Networks Limited ("SenSen", "SNS" or "the Company") is pleased to announce that it has been awarded a **"2018 Smart 50 Award"** for its Intelligent Video Analytics in Singapore including an alert zone at Changi Airport.

The **Smart 50 Awards** annually recognize global smart cities projects, honouring the most innovative and influential work.

The awards are jointly presented by Smart Cities Connect, Smart Cities Connect Foundation, and US Ignite. The latter is an influential coalition promoting the creation of next-generation applications and services that leverage advanced networking technologies to build the foundation for smart communities, including cities, rural areas, regions, and states.

Strong applicants submitted innovative projects with current or future municipal-scale impact and application. Projects clarified their connection with a municipal or municipal-similar partner such as a county, region, campus, installation, base, or facility complex.

SenSen won its award for the implementation of its world-leading video analytics software and artificial intelligence on Singapore's major roads, including Changi Airport and tourist attractions. Taken together the SenSen modules assist in optimising road safety, security and operational intellignce. The combined system has improved the movement of vehicles and people, and increased public safety at 50+ locations of strategic importance around the city.

Commenting on SenSen being named as a 2018 Smart 50 Awards recipient, CEO Subhash Challa said: *"The whole SenSen team is very proud to receive this prestigious award, which further demonstrates the power of our video analytics and Artificial Intelligence solutions to increase civic efficiency, public safety and economic development in an increasing number of cities around the globe. It is very clear that the pace of cities being connected through IoT disruption is increasing and SenSen continues to be a leader in this evolution."*
