

Quarterly Report

Activities Report for the Quarter ended
31 December 2017

HIGHLIGHTS

- After successfully raising \$A6.5 million, SNS listed on the ASX on 18 October 2017
- Unaudited Revenue for H1 2018 up by over 250% (pcp) to \$1.798 million
- Announced new contract wins in Singapore and Canada and participation in numerous Proof of Concept trials which may lead to full contracts
- 'Smartest Company in the World' NVIDIA selected SenSen as a 'Metropolis' partner for its global Smart Cities platform
- SenSen is a winner in 2018 Smart 50 Awards as one of the world's "50 most transformative smart projects" to be received on 26th March 2018.

Trading on the ASX

On 18 October 2017, SenSen Networks Limited ("SenSen", "SNS" or "the Company") announced that it had re-commenced trading on the ASX, after successfully raising A\$6.5m from new and existing institutional and retail shareholders. On the first day of trading the share price briefly doubled to \$0.20, before finishing the trading session 70% up on its re-listing price of \$0.10 and since then, the stock has traded as high as \$0.255.

Financial Performance

Unaudited Revenue for H1 2018 was up by over 250% on the previous corresponding period to \$1.798 million (as at 31 Dec 2017).

Revenues consisted of a combination of both new client contracts and existing recurring revenue from customers in Australia and overseas, with the biggest contribution occurring in the last quarter. This trend is expected to continue over the next half with revenue expected from both a strong pipeline of new potential clients and recurrent revenue from software as a service (SaaS) licence arrangements with existing clients.

Intelligent Transport Systems ("ITS")

Singapore:

On 11 December 2017, SenSen announced it had signed a new 'Changi Airport Video Content Analysis' multi-year contract to provide airport safety analytics at Singapore's Changi Airport, one of the busiest transport hubs in Asia. This involves video surveillance and tracking analytics around traffic movements and crowd control among other key metrics.

The new contract commenced in December 2017, and will generate initial revenue of ~A\$123,000 for SenSen in FY18 for systems, software licensing and commissioning.

Quarterly Report

Activities Report for the Quarter ended
31 December 2017

This contract follows the Company's multi-year contract to monitor parking and traffic at Changi Airport which was announced and commenced in October 2017, and will generate an initial upfront payment of A\$200,000 for SenSen in FY18 for systems, software and commissioning, and then recurring revenue of approximately A\$30,000 per annum for the following four years (from FY19 – FY22) for the software licence and maintenance of the systems.

Since late 2014, with the launch of its Smart Nation program, Singapore has been committed to becoming a "smart city". SenSen, working with Singapore's Land Transport Authority ("LTA"), already has more than 350 cameras equipped with its software monitoring for illegal and unsafe traffic behaviour in the Singapore CBD.

Calgary, Canada:

Just prior to the start of the last quarter, on 22 September 2017, SenSen announced it had signed a 5-year agreement with the City of Calgary, Canada, to monitor its streets and parking zones for parking violations. This will generate A\$1.3 million in revenue in FY18 and approx. A\$290,000 per annum from FY19 – FY22 for both fixed and mobile Licence Plate Recognition ("LPR") systems supplied by SenSen. Since then, the City of Calgary has expressed an interest in extending its contract to add additional systems and new services including SenSen's award-winning sign audit solution SenSIGN. Additional revenues are expected to follow.

NSW Roads and Maritime Services ("RMS"):

On 6 July, SenSen announced that it had been admitted to the new Roads and Maritime Services panel for Supply, Installation, Maintenance and Certification Services of Detection and Enforcement Camera Systems. Although the panel is not exclusive, based on previous financial performance it is anticipated that this extension could generate revenues of approximately \$A2 million over the course of the three years.

SenSen is currently working with RMS on finalising the plans for the deployment of the systems and testing and validating new integration requirements shared by them. The new system roll-outs are likely to commence in FY2019.

Proof of Concept ("POC") Trials:

On 11 December 2017, the Company announced that it was participating in numerous POC trials in various jurisdictions around the globe, both directly and through its channel partners. These trials are progressing well and upon successful completion of these trials and the awarding of contracts to SenSen, the Company will further update shareholders.

Existing City Council Clients:

SenSen has in place a number of software licensing arrangements with City Councils both in Australia and overseas which are expected to provide a recurring revenue stream going forward.

Gaming

On 11 December 2017, the Company announced the release of SenGAME 3.0 that can deliver up to 100% accuracy on bet detection, bet value estimation, occupancy on tables and related metrics using cameras embedded in low-cost Android phones. The software was developed in collaboration with Crown and addresses a long-standing issue for casinos globally. A new patent covering these latest inventions was lodged to secure the Intellectual Property (IP) for SenSen.

Corporate

New Verticals:

While SenSen's business focus is currently on the ITS and Gaming verticals, a number of opportunities are progressing in the retail and security sectors. The Company already has systems in a number of Australian shopping centres and overseas airports, and further development of the SenDISA platform is resulting in participation in a range of POC trials from policing activities to driving sales growth for retailers.

SenSen continues to establish its position as a disruptive leader in the evolution of Smart Cities by being recognised for its provision of Artificial Intelligence based Video-IoT data driven analytic solutions to increase civic compliance, public safety and economic development:

NVIDIA partnership:

On October 2017, SenSen announced that US artificial intelligence chip maker NVIDIA, ranked as the '*Smartest Company in the World*' by industry publication MIT Technology Review, had selected SenSen as one of the foundation companies for its global Metropolis Software Partner Program (a platform of software providers with the ability to meet the needs for rapid adoption of AI and deep learning for Smart Cities worldwide).

Cities 4.0 Summit:

SenSen is the Platinum Sponsor and CEO, Subhash Challa, is a keynote speaker at Australia's most innovative smart cities event, to be held 20-22 March in Melbourne. The Cities 4.0 Summit is a high-level gathering that brings together city leaders, innovators, entrepreneurs, CEOs, investors and thinkers to discuss strategy, technology and innovation for smarter cities and communities.

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. The cash flow presented in this document is based on the legal structure of the group and this may be different to the cash flows presented in the financial statements as the financial statements will be prepared under Australian Accounting Standards applicable to reverse acquisitions where the accounting parent is considered Sensen Networks Pty Ltd.
