## SenSen Networks Limited Year ended 30 June 2020

Details of the reporting period

Current period: 12 months ending 30 June 2020 (FY20	0)		
Prior period: 12 months ending 30 June 2019 (FY19)			
RESULTS FOR ANNOUNCEMENT TO MARKET			
		2020	2019
		\$	\$
Revenue from ordinary activities	Up 1% to	3,763,526	3,727,414
Loss from after tax attributable to members	Down 26% to	(3,887,684)	(5,277,798)
Total comprehensive loss for the year attributable to owners	Down 31% to	(3,726,059)	(5,400,622)

#### Dividends

There were no dividends paid or proposed for the period. The Group does not have a dividend re-investment plan.

#### Commentary on the results for Financial Year 2020

SenSen Networks Limited achieved a revenue result of \$3.76M for FY2020. This is a slight increase on the FY2019 result of \$3.73M.

SenSen also improved its year on year cash position, after recording its highest ever quarterly customer cash receipts of \$1.430M in the June 2020 Qtr, a 150% increase over the previous corresponding period (\$572K in June 2019 Qtr) and an 89% increase over the March Qtr (\$755K). SenSen finished FY2020 with a cash position of \$2.46M, a 25% increase on the FY2019 cash position of \$1.97M. This result was achieved without COVID-19 related government support.

SenSen's annual recurring revenue (ARR) profile continues to grow strongly with many of its existing customers ordering more software and services from SenSen. In line with our expectations, ARR from SenSen's government and blue-chip corporate customers continued to grow significantly with ARR also up ~33% to ~\$2M in FY2020, from ~\$1.5M in FY2019. Looking ahead, as previously advised, ARR is estimated to grow even more strongly in FY2021, in the order of ~75% to ~\$3.5M.

This recurring revenue will be comprised of contributions from a geographically diversified group of blue-chip Smart City customers including: City of Calgary and City of Edmonton in Canada; ATT Systems, Beaqon and ST Electronics in Singapore; City of Las Vegas in the US; Brisbane City Council, City of Gold Coast Council, Cairns Regional Council, Logan City Council, Ipswich City Council, in Queensland, Australia; Transport for NSW and Tweed Shire Council in NSW, Australia; City of Greater Geelong in Victoria, Australia; and, Global Parking Solutions and ImperiumIQ in New Zealand. SenSen will also receive additional orders for SenGAME 3.0 from our casino customers under existing arrangements.

SenSen's prudent cost-cutting measures continued in FY2020, including across-the-board 20% reduction in salaries, and reductions in sales, marketing, travel, office and IT costs. This strategy continues to be implemented and together with cash flow generated from contracted revenues, an operating cash flow positive outcome is expected to be achieved by the Company in FY2021.

With confirmed overall contracted revenues of ~\$5.6M for FY2021, SenSen also expects that it is likely to be profitable in the current financial year. Additional contract wins and revenue from other sources, including increasing sales demand for SenSen's Gemineye offering, is expected in FY2021 and this will further enhance SenSen's profitability.

In FY2020, SenSen did not experience any material interruptions or delays to customer deliveries and support due to COVID-19, highlighting SenSen's excellent execution capabilities, even while 90% of staff are working remotely.

SenSen continued to invest in its R&D pipeline in FY2020, filing additional patents to consolidate its technical leadership position within the global AI, IoT and Video Analytic solutions space. More patent applications are in the pipeline with strong progress in developing innovative and patentable products and solutions in both Smart City and Casino Gaming applications, including technology solutions relevant to COVID-19 related applications, such as monitoring of social distancing measures. Additionally, SenSen and the University of Melbourne successfully attracted a prestigious research grant from the Australian Research Council (ARC) to develop more accurate and efficient methods to digitise smart city assets. ARC is providing \$370K and SenSen is providing \$240K to support the three-year collaborative project with both organisations committing additional in-kind resources.

## Supplementary Appendix 4E Information

#### 1. Statement of significant accounting policies

This preliminary final report has been prepared in accordance with ASX Listing Rule 4.3A and the disclosure requirements of ASX Appendix 4E.

This report is to be read in conjunction with any public announcements made by SenSen Networks Limited during the reporting period in accordance with the continuous disclosure requirements of Corporations Act 2001 and the Australian Securities Exchange Listing Rules.

The preliminary financial report, comprising the financial statements and notes of SenSen Networks Limited and its controlled entities, complies with the measurement and recognition requirements of the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

Where necessary, comparative figures have been adjusted to comply with the changes in presentation in the current period.

The principal accounting policies adopted in the preparation of the preliminary financial report are consistent with those of the previous financial year with the exception of those noted below:

#### New accounting policies adopted for the first time

The Group applies, for the first time, AASB 16 *Leases*. This accounting policy has changed from that disclosed in the 30 June 2019 financial statements. The impact of the adoption of this standard and the new accounting policy that has been applied from 1 July 2019, where it is different to that applied in prior periods, is disclosed below.

#### AASB 16 Leases

This note explains the impact of the adoption of AASB 16 Leases on the group's financial statements and discloses the new accounting policies that have been applied from 1 July 2019 in note 1 below. The group has adopted AASB 16 retrospectively from 1 July 2019, but has not restated comparatives for the 2019 reporting period, as permitted under the specific transitional provisions in the standard. The reclassifications and the adjustments arising from the new leasing rules are therefore recognised in the opening balance sheet on 1 July 2019.

#### Nature of the effect of adoption of AASB 16

On adoption of AASB 16, the group recognised right-of-use-assets and lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of AASB 117 Leases. These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as of 1 July 2019. The weighted average lessee's incremental borrowing rate applied to the lease liabilities on 1 July 2019 was rate at an average of 7.9%.

For leases previously classified as finance leases the entity recognised the carrying amount of the lease asset and lease liability immediately before transition as the carrying amount of the right of use asset and the lease liability at the date of initial application. The measurement principles of AASB 16 are only applied after that date. The re-measurements to the lease liabilities were recognised as adjustments to the related right-of-use assets immediately after the date of initial application.

The effect of adopting AASB 16 as at 1 July 2019 (increase/ (decrease)) is, as follows:

	\$
Assets	
Right-of-use assets	236,823
Plant and equipment	(60,044)
Total assets	176,779
Liabilities	
Borrowings	(54,666)
Lease liabilities	248,013
Total liabilities	193,347
Net effect in retained earnings	(16,568)

- Right-of -use assets of \$236,823 were recognised and presented separately in the statement of financial position. This includes the lease assets recognised previously under finance leases of \$60,044 that were reclassified from plant and equipment.
- Additional lease liabilities of \$248,013 were recognised presented separately in the statement of financial position.
- Finance lease liability (included in borrowings) relating to finance leases was derecognised.
- The net effect of these adjustments had been adjusted to retained earnings of (\$16,568).

For leases previously classified as finance leases the entity recognised the carrying amount of the lease asset and lease liability immediately before transition as the carrying amount of the right of use asset and the lease liability at the date of initial application. The measurement principles of AASB 16 are only applied after that date. The re-measurements to the lease liabilities were recognised as adjustments to the related right-of-use assets immediately after the date of initial application.

The following table reconciles the minimum lease commitments disclosed in the Group's 30 June 2019 annual financial statements to the amount of lease liabilities recognised on 1 July 2019

	\$
Operating lease commitments disclosed as at 30 June 2019	653,860
(Less): Leases commitments entered subsequent to 30 June 2019	(450,000)
Operating lease commitments as at 30 June 2019	203,860
Weighted average incremental borrowing rate as at 1 July 2019	7.9%
Discounted using the lessee's incremental borrowing rate of at the date of initial application	203,186
Add: finance lease liabilities recognized as at 30 June 2019	54,666
(Less): short-term leases recognized on a straight-line basis as expense	(9,839)
Lease liabilities recognized as at 1 July 2019	248,013
Of which are:	
- Current lease liabilities	46,171
- Non-current lease liabilities	201,842
Lease liabilities recognized as at 1 July 2019	248,013
Additional lease liability recognized as at 1 September 2019	371,346
Changes in lease liability in the period to 31 December 2019	(59,646)
Changes in lease liability in the period to 30 June 2020	(127,547)
Lease liabilities as at 30 June 2020	432,166

The recognised right-of-use assets relate to the following types of assets:

	Consolidated	
	30 June 2020	1 July 2019
	\$	\$
Properties	343,957	176,779
Motor vehicles	42,715	60,044
Total right-of-use assets	386,672	236,823

The associated right-of-use assets for property leases were measured on a retrospective basis as if the new rules had always been applied. Other right-of use assets were measured at the amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the balance sheet as at 30 June 2019. There were no onerous lease contracts that would have required an adjustment to the right-of-use assets at the date of initial application.

#### Impact on segment disclosures and earnings per share

Adjusted EBITDA, segment assets and segment liabilities for 30 June 2020 all increased as a result of the change in accounting policy. Lease liabilities are now included in segment liabilities, whereas finance lease liabilities were previously excluded from segment liabilities.

Losses per share for the twelve months to 30 June 2020 would not materially change as a result of the adoption of AASB 16.

#### Practical expedients applied

In applying AASB 16 for the first time, the group has used the following practical expedients permitted by the standard:

- the use of a single discount rate to a portfolio of leases with reasonably similar characteristics
- reliance on previous assessments on whether leases are onerous
- the accounting for operating leases with a remaining lease term of less than 12 months as at 1 July 2019 as short-term leases
- the exclusion of initial direct costs for the measurement of the right-of-use asset at the date of initial application, and
- the use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease.

The group has also elected not to reassess whether a contract is, or contains a lease at the date of initial application. Instead, for contracts entered into before the transition date the group relied on its assessment made applying AASB 117 and Interpretation 4 Determining whether an Arrangement contains a Lease.

#### Accounting policy for leases

The group leases office leases, and car. Rental contracts are typically made for fixed periods of 3 to 8 years but may have extension options. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants, but leased assets may not be used as security for borrowing purposes.

Until the 2019 financial year, leases of property, plant and equipment were classified as either finance or operating leases. Payments made under operating leases (net of any incentives

received from the lessor) were charged to profit or loss on a straight-line basis over the period of the lease.

From 1 July 2019, leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the group. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payment that are based on an index or a rate
- amounts expected to be payable by the lessee under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise IT-equipment and small items of office furniture.

#### 2. Material factors affecting the economic entity for the current period

The loss of the Group for the financial year after income tax amounted to \$3,887,684 (2019: loss of \$5,277,798).

An analysis of underlying Adjusted net loss in the current period which is calculated after excluding the effects of costs incurred but not expected to occur in the future is outlined below:

	Consolidated		
	2020 \$	2019 \$	
Net loss for the year after tax	(3,887,684)	(5,277,798)	
Share-based payment expense <sup>1</sup>	(290,405)	(1,287,967)	
Adjusted Net loss for the year after tax	(3,597,279)	(3,989,831)	

<sup>1</sup>For financial year ended 30 June 2019, share-based payment expense included amounts that were the product of a model-based valuation.

#### 3. Retained Earnings

	Co	Consolidated	
	2020 \$	2019 \$	
Balance 1 July Net loss for the year	(32,214,728) <sup>1</sup> (3,887,684)	(26,920,362) (5,277,798)	
Balance 30 June	(36,102,412)	(32,198,160)	

<sup>1</sup>The Opening balance of Retained Earnings at 1 July 2019 includes an amount of \$16,568 in relation to the first-time adoption of AASB 16, Leases. Refer to Consolidated Statement of Changes in Equity for further detail.

#### 4. Additional Dividend Information

There were no dividends paid or proposed during the year (2019: nil).

#### 5. Dividend Reinvestment Plan

The company has no dividend reinvestment plan in operation.

#### 6. NTA Backing

	Consolidated	
	2020 ¢	2019 ش

	No.	No.	
Weighted average number of ordinary shares outstanding during the year used in calculating basic EPS	435,573,293	416,743,424	
Loss attributable to the ordinary equity holders of the company used in calculating loss per share:	(3,887,684)	(5,277,798)	

#### 8. Share Buyback

The company had no on-market buy back in operation during the year ended 30 June 2020 or the year ended 30 June 2019.

#### 9. Segment information

Operating segments are identified on the basis of internal reports that are regularly reviewed by the executive team in order to allocate resources to the segment and assess its performance.

AASB 8 *Operating Segments* states that similar operating segments can be aggregated to form one reportable segment.

The principal areas of operation of the group are as follows:

- Smart Cities
- Retail & Leisure

#### **Segment Revenues and Results**

The following is an analysis of the Group's revenue and results by reportable operating segment for the periods under review.

	Smart Cities	Retail & Leisure	Consolidated	Smart Cities	Retail & Leisure	Consolidated

#### 12. Trade and other payables

	Consolidated		
	2020 \$	2019 \$	
Current			
Trade and other payables	1,094,691	1,463,987	
Other liabilities	534,830	42,429	
Contract liabilities	1,399,926	281,837	
	3,029,447	1,788,253	

All trade and other payables are expected to be settled within 12 months.

#### 13. Borrowings

		Consolidated		
		2020	2019	
		\$	\$	
(a)	Loans from related parties – unsecured	400,101	820,000	
(b)	Bank Loan	912,666	450,000	
(c)	Car Loan	-	54,667	
Total Cu	rrent Borrowings	1,312,767	1,324,667	

a) A loan facility of \$500,000 was agreed with Subhash Challa and related parties in June 2019.
 \$400,000 of this facility was drawn down as at 30 June 2020.

A shareholder, Adapt Capital Pty Ltd extended a loan to the Company with no interest payable. On 12 December 2019, the Company issued 3,333,333 shares to Adapt Capital Pty Ltd to convert this historical loan to SenSen for consideration of \$500,000. The fair value of the shares issued is \$367,667, thus, this resulted in a gain of \$133,333 recognized as other income in profit and loss.

b) Includes a bank debt with Commonwealth Bank for \$450,000 secured by an account set-off arrangement with a matching term deposit and a first ranking charge over present and after acquired property. Variable rate interest of 5.45% is charged and the loan term expires on 13 December 2020.

A short-term working capital loan of \$440,000 was agreed with Rocking Horse Nominees Pty Ltd in April 2020. This loan is expected to be paid back in full through a Research and Development grant via the Company's tax return for 30 June 2020.

c) The Company has a motor vehicle loan which has been reclassified to lease liabilities upon adoption of AASB 16 on 1 July 2019. Refer to Note 1 for details.

Net cash used in operating activities	(3,247,029)	(4,507,922)

#### 17. Trends in Performance

The business recorded flat revenue performance over the previous financial year. The FY2020 revenues consisted primarily of existing recurring contracted revenue and additional orders from SenSen's Smart Cities customers in Australia and overseas, with the biggest relative contribution occurring in the first half.

In the financial year ahead, the Company expects growing revenues from both a strong pipeline of new potential clients and recurrent revenue, as well as from software as a service (SaaS) licence arrangements with existing clients.

## 18. Other Factors that Affected Results in the Period or which are Likely to Affect the Results in the Future

Longer than expected timelines for the awarding of new government and Council contracts following tender processes and trials resulted in the timing of a number of anticipated positive financial outcomes for SenSen shifting to later in calendar year 2019.

In the Smart Cities business vertical, SenSen launched the world's first AI-powered smartphone app, Gemineye, in March 2019, which offers cities around the globe access to affordable, accessible, highly accurate process automation services for smart cities. The new solution is a game changer for governments, cities and councils, offering an unprecedentedly cost-effective solution for smart city management and significantly broadening SenSen's global addressable market while reducing the timeframes for technology adoption and thereby SenSen revenue outcomes.

The impact of COVID 19 on the Company is referred to above within the 'Commentary on the results for Financial Year 2020'.

#### 19. Controlled Entities Acquired or Disposed of

No controlled entities were acquired or disposed of during the year.

#### 20. Associates and Joint Venture Entities

The Company did not acquire or dispose of any interests in Joint Ventures or Associates during the year.

#### 21. Other Significant Information

There is no other significant information in addition to the information that has been included in this report in relation to the company's financial performance or financial position.

#### 22. Subsequent events

There were no material subsequent events after the year-end date of 30 June 2020, other than disclosed in note 18 above.

#### 23. Audit Status

This report is based on accounts which are in the process of being audited.
