

#### 1 December 2020

### SenSen Acquires Snap Network Surveillance

### **HIGHLIGHTS:**

- SenSen has acquired the business and business assets of Snap Network Surveillance
  world leader in Al-powered multi-camera tracking software
- Acquisition of all intellectual property including patents, trademarks and know-how for A\$1,000,000
- Consideration for the transaction is SNS equity priced at the last 7 business days
  VWAP of A\$0.1012 per share, being a total of 9,881,423 shares
- Snap's highly-skilled AI software engineers to join SenSen's world-leading technical team, including Dr. Henry Detmold, who is an acknowledged leader in large scale network video surveillance solutions.
- Snap is a leading provider of AI-enabled, multi-camera network relationships discovery and visualisation software that allows surveillance camera operators to efficiently track persons of interest over large-scale video surveillance environments.
- SenSen will integrate the Snap technology into its proprietary SenDISA platform to offer new ground breaking products and solutions to global markets.
- Over the last couple of years, Snap focused primarily on making inroads into the US market and has acquired a number of high security prisons and universities as its customers, including a new customer in Utah state, USA, in November 2020.
- Snap also made significant inroads into the Casino market with a number of POCs lined up in the US where tracking people across large-scale surveillance camera networks is mission-critical.
- Snap acquisition furthers SenSen's ambition to grow aggressively in the US, following the City of Las Vegas contract win in 2020 and other US customers engaged in POCs, as well as SenSen being admitted to the OTCQB market, headquartered in the US.

Leading AI solutions provider SenSen Networks Limited (ASX: SNS, "SenSen" or "the Company") is pleased to announce the acquisition of the business and business assets of Snap Network Surveillance Pty Ltd ("Snap") which completed today. The acquisition ("Acquisition") follows the completion of technical and legal due diligence and the execution of the Business Purchase Agreement with Snap, signed contemporaneously with completion.

Snap (<u>www.snapsurveillance.com</u>) is a private company based in Adelaide, South Australia, that was formed in 2009 based on technology emanating from the internationally recognised Australian Centre for Visual Technologies (ACVT), now known as the Australian Institute of Machine Learning. Snap designs and builds Al-enabled, multi-camera tracking software that allows customers to take control of their large-scale video surveillance environments.

Snap's lead product, *Force Multiplier* (FMX), integrates with the world's leading video management software systems including Milestone, Bosch, Honeywell, Genetec to name a few and has been installed on several sites in the US, Australia, Asia, Middle East and Europe. Snap products and solutions are highly relevant to all prospective customers and market segments where there is a need to track persons of interest over large-scale camera networks in real time or forensically. Snap's current and potential customers include Airports, High Security Prisons, Shopping Centres, Universities and Casinos.

SenSen has been independently providing solutions into the same market segments for many years, and upselling the additional SNAP functionality will be appreciated by SenSen's existing customer base and generate additional revenue streams to SenSen.

By combining Snap's Al-powered multi-camera networked tracking technology with SenSen's automated multi-object tracking technology within individual camera views, SenSen plans to release a ground-breaking new product - "SenTRACK"- which will have the revolutionary new capability to automatically detect and track people throughout a large-scale video surveillance network.

This is expected to deliver significant new business insights to SenSen's current and prospective customers. Potential applications of the integrated technology includes antimoney laundering applications within Casinos, path-to-purchase of customers within retail stores and COVID-19 related tag and trace applications within facilities. SenTRACK will also deliver high accuracy people occupancy metrics within buildings, which is a key work-place health and safety requirement for all businesses in the post COVID-19 world, simply by tapping into the existing CCTV networks.

Additionally, SenSen has already identified new international customers seeking the integrated SenSen/Snap solution. It is anticipated that the combined offering will allow SenSen to become a market leader in the large-scale video surveillance industry.

Commenting on the Snap Acquisition, SenSen's CEO Subhash Challa said:

"This is a very strategic acquisition for SenSen. Snap's Force Multiplier Product and the background IP will be a fantastic augmentation to the SenSen product portfolio. Adding the ability to seamlessly track objects in a multi-camera environment will be a major benefit for many of SenSen's existing customers providing additional functionality, and to build on our value proposition for new customers in the security and surveillance world."

"I would like to thank the Board and senior staff of Snap including the founding member, Dr. Henry Detmold, for their willingness to explore a common pathway at a time when many sectors of the economy are reluctant to look too far ahead. At SenSen we will continue to scrutinise strategic acquisitions presented to us if they align with our global growth ambitions for the AI platform we have built and continue to further develop."

Snap Chairman Geoff Thomas said:

"After many years of development, Snap is very happy to find a partner in SenSen to take the product forward into multiple global markets and realise the potential for the IP across multiple market verticals. We are also very pleased to note that the Snap development team has joined SenSen."

### **Transaction Details**

- <u>Consideration:</u> A\$1,000,000 by way of the issue of fully paid ordinary shares in SenSen ("Consideration Shares").
- <u>Price:</u> \$0.1012 per Consideration Share (the VWAP of SenSen's fully paid ordinary shares during the seven business days ending on the date prior to the completion).
