

# Parking Management Solutions

## Smart Cities

*SenSen's unique and flexible solutions optimize the journey experience for your residents through self-serving automation products. Our highly intuitive user interface simplifies administration works and empowers city officials.*

# Parking Management Solutions

SenSen's parking management solutions offer a wide range of technologies and digital services to the cities that enable parking officers and city administration to have complete control over parking facilities in any environment. Our world-leading AI software allows operators to configure and deliver unique commutation experiences in a way users want.

SenSen provides four different parking management solutions which are fully customizable with dynamic threshold time limits and business rules. These highly accurate and compliant solutions can be integrated with any external system and will assist cities in streamlining and maximizing parking enforcement process.

## What this solution can do for you

### Streamline Enforcement Process

Real-time alerts and remote monitoring services with detailed and centralized access to infringement data.

### Proactive Demand Forecasting

Opportunity to uncover future demand patterns and optimize infrastructure accordingly.

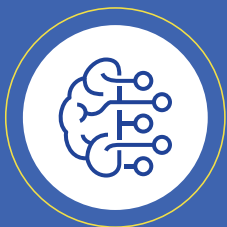

### Improve Operational Productivity

The efficient solution enforces 1000s of vehicles per hour, usually requiring 4-5 rangers on foot.

### Environmental Mapping Technology (EMT)

Intelligently build an up-to-date street view to precisely determine the exact location even when the GPS signal is blocked.

## Key Features

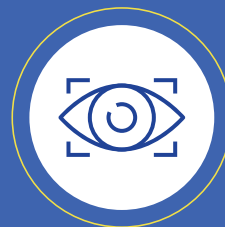

World's most advanced AI solution

Cost-effective end-to-end solution

Highly accurate and automated workflow

Real-time monitoring and alerting system

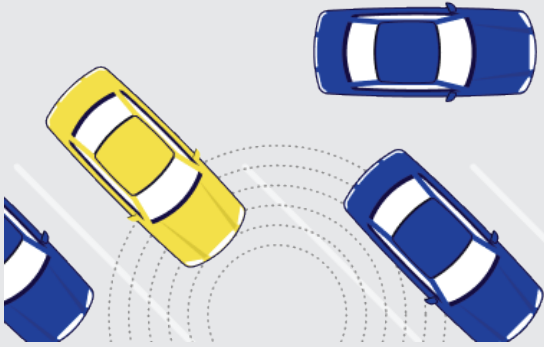

Flexible to suit your day-to-day needs

*Positively transforming people's lives through Sensor AI*

## Parking Occupancy & Guidance

*SenSen's parking occupancy detection is a camera-based solution that provides highly accurate bay level occupancy detection.*

*Designed to provide an accurate, adaptable and affordable solution.*

## Parking Enforcement

*SenSen's parking enforcement is an end-to-end automated violation detection solution with robust evidence generation software.*

*Designed to help streamline business workflow and day-to-day parking operations.*
