# SenMAP

**Asset Mapping Technology** 

### **SenMAP – Asset Mapping Technology**

THE PROBLEM

Limited knowledge of asset locations, quantities and status

THE SOLUTION

SenMAP detects and allows users to visualize city Infrastructure data, such as parking meters, street signs, and fire hydrants, with their exact location, in a digital asset system. It will also provide functions such as route planning and data point exporting for other applications.

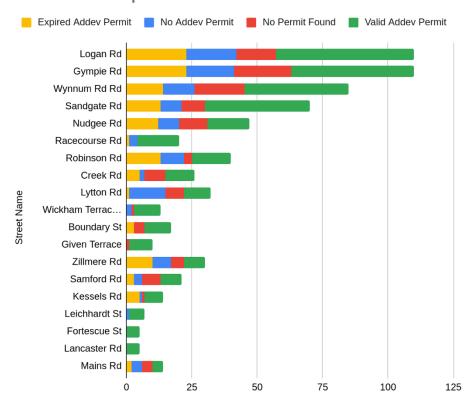

### Relevant Experience – Brisbane

#### **Brisbane Remote Sensing Pilot Project**

June 2022 - Aug 2022

Detection and validation of permits for assets across the Brisbane city council

#### **Top 20 Street wise Status count**
