

Dynamic Curb & Parking Intelligence

SenOPS

Every patrol reads the whole curb.

Block by block, hour by hour, your officers measure turnover, dwell, and demand every time they pass. SenOPS captures all of it.

SenOPS turns that into a single live view of the curb: occupancy, compliance, and revenue you can act on today, from the operation you already run.

One live picture of the curb, from the data you already own.

- ✓ **See the whole curb in real time.** A continuous curb census with no new routes, sensors, or crews
- Occupancy and revenue on one screen.**
- ✓ **Compliance, coverage, and utilization in live dashboards, with city-ready reports built in**

- ✓ **Get answers in seconds.** Ask a question in plain English and see it now, no report queue, no data team
- ✓ **Put officers where it counts.** The live map ranks blocks by what matters most, so the same shift catches more
- ✓ **Works with what you own.** Connects to your enforcement, permit, payment, and camera systems, vendor-neutral

From Patrols to Intelligence
